Internet Sales Set Up

This course is designed to show customers the advised "best practice" for internet performance setup and to enable users to gain a better understanding of the various options available for the online pages to create a better experience for the end consumer.

We will also look at the best ways in which to report on Internet sales, and Batch Printing.

Who is it for?

This course requires some experience of performance setup in ProVenueMax. It is ideally suited to users who are new to internet ticketing and would like to gain a better understanding of how online sales work, and how best to configure their system.

Course objectives:

- Understanding facility ID's
- Learning the best practice for performance setup
- Finding the best way to configure Price Maps and Best Seat Maps
- Looking at additional functionality available for ProVenueOnline
- To be able to problem-solve common errors

Location: Milton Keynes

Cost: £140 + VAT per delegate
